

Neuronasium Lab

FOR CLASS, STAFF, & SMALL GROUPS

What is a Neuronasium?

The Neuronasium is a research-backed learning space for adolescents that pairs physical movement with academics. It works especially well for those who require intensive behavioral intervention or thrive in small learning environments.

This regulated environment reinforces positive development and strengthens neural pathways to improve cognitive function. After time in the lab, school leaders see accelerated **academic achievement**, **alleviated stress**, **improved overall well-being**, and **behavioral transformations**.

MOVEMENT DOESN'T REPLACE ACADEMICS— IT IMPROVES THEM!

What are the Benefits?

As students learn and move in the Neuronasium, they gain greater self-awareness, heightened self-esteem, and improved social skills.

Helps educators foster more attentive students who perform better.

Challenge, feedback, & physical activity: 3 components essential for a healthy brain.

Strengthens neural connections to improve reading, writing, math, & memory.

Promotes self confidence, greater self-awareness, & improved social skills

STAND, PEDAL, MOVE!

*CUSTOMIZABLE
OPTIONS!*

FULL INSTALLATION & 10-YEAR WARRANTY INCLUDED.

DESIGNED FOR 2 KEY PURPOSES:

Maximize cognitive capabilities

Provide adolescents with an advantage in learning

TAKE A LOOK INSIDE:

Add-On Professional Development

Learn how to use the lab in multiple ways, engage diverse students, incorporate it across departments, and build a sustainable schedule that keeps the space active and valuable throughout the school day.

WHO CAN GET CERTIFIED IN ABL?

PE & FITNESS INSTRUCTORS

Fitness circuits, conditioning, strength, endurance, fitness goals, and supplemental PE.

CLASSROOM TEACHERS

Movement-based academic activities, brain breaks, multisensory learning, review activities, and class sessions.

HOMEROOM & ADVISORY

Start-of-day movement, brain activation, focus activities, and classroom reset

MTSS, INTERVENTION, & SUPPORT TEAMS

Academic intervention, small-group support, movement-based tutoring, & targeted skill development.

SCHOOL LEADERSHIP

Wellness days, fitness challenges, family events, health initiatives, and community programming.

STUDENTS

Fitness clubs, wellness challenges, leadership opportunities, peer-led activities, and intramurals.

SPED, PT & OT TEAMS

Motor development, sensory-motor activities, modified fitness, coordination, balance, & individual goals

FACULTY & STAFF

Fitness sessions, movement breaks, wellness challenges, stress relief, and employee wellness programs.

ADMINISTRATORS & BEHAVIOR TEAMS

Structured movement resets, behavior support, re-entry, self-regulation, and positive alternatives to traditional discipline.
